CAREER SUMMARY

Results-driven **Engineering Manager** with **8+ years** of experience leading high-performance engineering teams in **Fintech, BNPL, and Trust & Safety** domains. Proven ability to **build teams from the ground up**, own end-to-end roadmaps, and deliver **low-latency, high-reliability distributed systems** at scale. Currently acting as Engineering Manager at **Tamara** (MENA's leading BNPL platform), driving compliance, fraud prevention, and infrastructure strategy. Seeking to bring **engineering leadership expertise** to a high-growth organization in **Dubai, UAE**.

SKILLS AND STRENGTHS

Languages: Java, Go (Golang), Python, Scala, Rust, TypeScript, Node.js

Architecture: Microservices, Event-Driven, Serverless, Domain-Driven Design (DDD), CQRS

Databases: MySQL, PostgreSQL, Cassandra, Redis, Elasticsearch, MongoDB, DynamoDB

Cloud & Infrastructure: AWS (EC2, EKS, Lambda, RDS, SQS, SNS), Kubernetes, Docker, Terraform, GitOps

Streaming & Messaging: Kafka, SQS, RabbitMQ, gRPC, REST

Observability: Prometheus, Grafana, ELK Stack, Datadog, OpenTelemetry

Security & Compliance: Fraud Detection, Risk Rule Engines, KYC/AML Workflows, PCI-DSS awareness

Engineering Leadership: HLD/LLD, Hiring & Onboarding, OKR/KPI Delivery, Roadmaps, Stakeholder Management, Agile/Scrum

WORK HISTORY

Tamara

04/2025 – Present

Senior Backend Engineer (Acting Engineering Manager – Trust & Safety / Integrity)

Tamara is MENA's leading Buy Now Pay Later platform, operating across Saudi Arabia, UAE, and Kuwait.

- **Built and scaled** the Trust & Safety (Integrity) engineering team from 0 – owning full hiring lifecycle, onboarding, and day-to-day engineering execution
- **Owned end-to-end roadmap and delivery planning**, aligning engineering priorities with compliance, risk, and business KPIs across cross-functional teams
- **Architected transaction integrity and fraud prevention systems** for secure BNPL processing, reducing fraudulent transaction rates significantly
- **Drove cross-functional initiatives** in collaboration with Product, Risk, Compliance, and Platform teams, improving engineering-to-business alignment
- **Improved system latency to 100 ms** and reduced incident response time by **45%** via observability and alerting systems (Grafana, Prometheus)
- Led **infrastructure cost optimisation** initiatives, reducing cloud spend while maintaining SLA commitments
- Introduced **engineering best practices**: code reviews, design docs, on-call rotations, and incident post-mortems

Paytm

03/2022 – 04/2025

Technical Lead – Merchant Lending & Risk Platform

- Led Merchant Lending platform handling **20M+ daily requests** with **2,000+ TPS**, ensuring 99.9% availability
- **Designed and architected multi-tenant Risk Rule Engine** for real-time fraud detection and credit decisioning across millions of merchants
- Improved overall system reliability by **30%** through platform re-architecture and elimination of single points of failure
- Reduced critical API latency by **95%** via Cassandra-based data layer redesign
- **Integrated 8 lending partners**, enabling **1,500 Cr+ monthly disbursement revenue**
- Led a team of **8+ engineers**, conducting 1:1s, career growth planning, and technical mentoring
- **Improved developer productivity by 20%** through internal tooling, CI/CD improvements, and documentation
- Reduced customer support escalations by **20%** through self-serve internal tooling

Incedo Inc

04/2021 – 01/2022

Senior Software Engineer – IoT & Platform

- Developed diagnostics and monitoring tooling for IoT platforms, reducing support tickets by **15%**
- Improved system responsiveness and reduced infrastructure load by **10%** via async communication patterns
- Designed cloud-compatible microservices for IoT device management and telemetry processing

John Deere India

07/2018 – 03/2021

Senior Software Engineer – Enterprise Platform & DevOps

- Built microservices-based enterprise platform enabling **multi-country deployments** via GitOps-based CI/CD strategy (Jenkins, Terraform, Git)
- Owned AWS infrastructure and DevOps workflows, reducing cloud team dependency by **40%**
- Built SPAs using React & Material UI with Spring Boot backends, improving internal operations efficiency
- Automated business workflows using AWS Lambda (Python & Node.js), saving significant manual effort
- Managed vendor negotiations and third-party delivery execution

EDUCATION

B.E. Computer Science

First Class with Distinction

Army Institute of Technology, Pune (Affiliated to Savitribai Phule Pune University)

HSC (12th)

90.4%

Army Public School Mamun Cantonment

SSC (10th)

CGPA: 10/10

Army Public School Mamun Cantonment

LEADERSHIP & ACHIEVEMENTS

- **Engineering Manager (Acting)** at Tamara – one of MENA's top-funded fintech startups
- Winner of multiple **company-level hackathons**, driving innovative solutions under time pressure
- **National-level basketball player** – demonstrating leadership, resilience, and team collaboration under high-pressure environments
- Active contributor to **system design, distributed systems, and engineering leadership** communities
- Presented **IEEE research paper** on Cloud Resource Optimisation during undergraduate studies
